Whilst we have taken every effort to produce a brochure to accurately represent concrete coloured with Redicrete colours, we can not guarantee the colour of the final concrete product. The colours shown in this brochure together with any samples or displays of Redicrete colours should be used as a guide to what may be achieved. All concrete colours will be influenced by a number of factors including the concrete raw materials (notably cement, supplementary cementitious products, aggregates and sand that can vary significantly with location), moisture content, curing, finishing techniques and weather conditions that are not under our control and that we can not guarantee. Concrete contains a number of man-made and naturally occurring raw materials that are not colour-controlled. For projects where colour is important or critical we recommend obtaining or placing a representative concrete sample from your concreter, precaster or concrete product manufacturer. We recommend using contractors experienced in placing and finishing coloured concrete and viewing local examples of their work. All information is offered without warranty, representation, inducement or licence and Redicrete does not assume legal responsibility for reliance upon the same.
